Subject: Public meeting for Lane Plating

This is a tentative invite for the Lane Plating public meeting. We are still working out the details on time and location but it looks like September 10 is the day the city people would like to have the meeting. I will update this invite when I have more information. I will probably do a site visit before the meeting if you would like to attend. Let me know if you're interested in the site visit. We do not have a lot of new data, so the meeting will focus on past activities and describing the Superfund process.
